

CompliVibe

OPERATIONS MANUAL

How the company runs day to day — the three operating layers, who owns what, the metrics that matter, and the rhythm that keeps them on track.

Confidential — Internal · Version 1.0

THE OPERATING MODEL

CompliVibe runs on three operating layers. Because we are a trust company, operational rigour is not overhead — it is the product. The way we run our own platform, serve our customers, and manage our business is the same standard we sell.

- **Platform Operations** — keeps the product secure, reliable, and always current.
- **Customer Operations** — turns a sale into retained, expanding, satisfied customers.
- **Business Operations** — runs the company lean, funded, compliant, and measured.

Operating principles

- Own the standard we sell — our own security and governance are proof points, not afterthoughts.
- Run on numbers — every function has an owner, a cadence, and a metric.
- Automate the compounding work — especially the regulatory-update engine.
- Milestone over calendar — reviews gate on outcomes, not dates.

CONTENTS

Layer 1. PLATFORM OPERATIONS

- 1.1 Reliability & Uptime
- 1.2 Security Operations
- 1.3 The Regulatory-Update Engine
- 1.4 Data Pipeline & Integrity
- 1.5 Release & Deployment
- 1.6 Platform Incident & Escalation

Layer 2. CUSTOMER OPERATIONS

- 2.1 Onboarding & Time-to-Value
- 2.2 Customer Success & Retention
- 2.3 Support & SLAs
- 2.4 Renewals & Expansion
- 2.5 Feedback → Roadmap

Layer 3. BUSINESS OPERATIONS

- 3.1 Revenue & GTM Operations
- 3.2 Finance Operations
- 3.3 Legal & Compliance Operations
- 3.4 People & Vendor Operations
- 3.5 Metrics & Reporting

Operating Rhythm

Metrics That Matter

Layer 1 PLATFORM OPERATIONS

Layer owner: Head of Engineering / Security

1.1 Reliability & Uptime

Keep the platform available and fast enough for enterprise.

- Operate to a 99.9% uptime SLA.
- Monitoring, alerting, and an on-call rotation.
- Runbooks for common failures.

Owner Head of Engineering **Cadence** Continuous **Key metric** Uptime %, MTTR

1.2 Security Operations

Be the most secure system we sell to.

- Maintain our own SOC 2 / ISO 27001 posture.
- Periodic access reviews and threat monitoring.
- Continuously collect audit evidence.

Owner CISO **Cadence** Continuous / monthly **Key metric** Control coverage, findings closed

1.3 The Regulatory-Update Engine

Turn every regulatory change into a same-week product update.

- Detect rule changes across all covered frameworks.
- Assess impact and update obligations.
- Push updates to customers within 48 hours.

Owner Head of Compliance Eng **Cadence** Continuous **Key metric** Update latency ($\leq 48h$), frameworks covered

1.4 Data Pipeline & Integrity

Assessments flow in, score reliably, and stay isolated.

- Ingest, score, and anonymise assessment data.
- Enforce strict tenant isolation.
- Validate pipeline accuracy end to end.

Owner Head of Data **Cadence** Continuous **Key metric** Pipeline success rate, isolation checks

1.5 Release & Deployment

Ship changes safely and often.

- CI/CD with automated testing and staged rollout.
- Controlled change management and rollback plans.
- Separate development from production.

Owner Head of Engineering **Cadence** Per release **Key metric** Deploy frequency, change-failure rate

1.6 Platform Incident & Escalation

Detect, contain, and recover fast — then learn.

- Severity levels with clear escalation paths.
- Detect, contain, eradicate, recover.
- Blameless post-mortems with actions.

Owner On-call Lead **Cadence** Per incident **Key metric** Incident count, time-to-resolve

Layer 2 CUSTOMER OPERATIONS

Layer owner: Head of Customer Success

2.1 Onboarding & Time-to-Value

Get a new customer to their first Trust Score in days.

- Templated onboarding from signup to first value.
- Guided integration and framework selection.
- Remove friction to first score.

Owner Onboarding Lead **Cadence** Per customer **Key metric** Time-to-first-value (<7 days)

2.2 Customer Success & Retention

Keep customers engaged and improving.

- Owned accounts with monthly / quarterly reviews.
- Drive measurable score improvement over time.
- Spot risk and expansion moments early.

Owner Head of Customer Success **Cadence** Monthly **Key metric** NRR, logo retention

2.3 Support & SLAs

Resolve issues within committed timeframes.

- Tiered support with defined response / resolution SLAs.
- Self-serve knowledge base for common needs.
- Escalation path to engineering.

Owner Support Lead **Cadence** Continuous **Key metric** CSAT, response time

2.4 Renewals & Expansion

Grow revenue from the base.

- Track usage and score trend per account.
- Flag at-risk renewals early.
- Upsell added frameworks and modules.

Owner Head of Customer Success **Cadence** Per renewal cycle **Key metric** Renewal rate, expansion revenue

2.5 Feedback → Roadmap

Turn customer pain into product.

- Capture and prioritise customer feedback.
- Feed it into the roadmap.
- Close the loop with customers visibly.

Owner Product Ops **Cadence** Bi-weekly **Key metric** Feedback cycle time, feature adoption

Layer 3 BUSINESS OPERATIONS

Layer owner: COO / CFO

3.1 Revenue & GTM Operations

Run a disciplined, measurable growth engine.

- Partner-led plus outbound motion with clean attribution.
- CRM discipline and pipeline hygiene.
- Defined targets and conversion tracking.

Owner Head of Revenue Cadence Weekly Key metric Pipeline coverage, CAC, win rate

3.2 Finance Operations

Keep the company funded and efficient.

- Track cash collection, burn, and runway.
- Invoicing and collections.
- Forecasting and budget discipline.

Owner CFO Cadence Weekly / monthly Key metric Runway (months), gross margin

3.3 Legal & Compliance Operations

Keep ourselves as compliant as our customers.

- Maintain corporate filings and obligations on time.
- Manage customer contracts, DPAs, and partnerships.
- Enforce the policy manual internally.

Owner Legal Cadence Continuous Key metric Filings on time, contract turnaround

3.4 People & Vendor Operations

Build the team and manage partners.

- Hiring, onboarding, NDAs, and access lifecycle.
- Coordinate vendors and partner teams.
- Hold quality and SLA thresholds.

Owner Head of People / Ops Cadence Continuous Key metric Time-to-hire, vendor SLA adherence

3.5 Metrics & Reporting

Run the company on one source of truth.

- A single dashboard: ARR, customers, churn, CAC, uptime, score-improvement.
- Keep it current and trusted.
- Drive decisions from the numbers.

Owner COO Cadence Weekly Key metric Dashboard freshness, review attendance

OPERATING RHYTHM

The cadence that keeps all three layers aligned. Every review has an owner, an agenda, and decisions — not just status.

Daily

- Engineering stand-up · on-call handoff · pipeline glance.

Weekly

- GTM / pipeline review · customer-health review · security triage · cash & runway check.

Monthly

- Business metrics review · roadmap review · finance close · customer QBR prep.

Quarterly

- Customer QBRs · plan / OKR and phase-gate review · risk review · board update.

METRICS THAT MATTER

The core numbers on the single company dashboard, grouped by layer. If it is not measured here, it is not run here.

Platform

- Uptime %, MTTR, regulatory-update latency ($\leq 48\text{h}$), deploy frequency, change-failure rate, gross margin (engine automation).

Customer

- Time-to-first-value, NRR, logo retention, CSAT, renewal rate, expansion revenue, average score-improvement.

Business

- ARR, new customers, churn, CAC, LTV:CAC, runway, pipeline coverage, partner-sourced pipeline %.

THE THROUGH-LINE Platform ops prove we are secure, customer ops drive retention, business ops keep us lean — and we hold ourselves to the standard we sell.
